

INTEGRATION ENGINE

Every manufacturer has processes and systems for managing important information to their operations. CloudDispatch's web-based API allows for full integration with ERP, MES, EAM/CMMS, MOM, and other systems, allowing for a seamless flow of important data between systems. Our API unlocks the synchronization of critical production data to the source; your people on the plant floor.

The integration server is a stand-alone extension of our API that allows you to take advantage of both existing and custom integrations with ERP and local systems. Additionally, for manual integration, CloudDISPATCH provides a seamless process for upload and import of data.

Our open source API allows for integration with any system. Here are just a few of the most commonly integrated platforms:

FEATURE SETS

Full Work Order Module

- Simplify system validation for multiple systems in highly regulated operations
- Automatically sync cycle counts
- New machines automatically populated across systems
- Sync and manage spares quantities and locations
- No need to have additional seat licenses with your ERP in order to have data input on the plant floor
- Eliminate double entry of data with integrated systems
- Seamlessly pull parts and materials data from ERP and feed consumption back into ERP
- Provides much more detailed and accurate reporting functionality across systems
- Enables technicians to be more efficient and productive in all tasks
- L2L assisted deployment to ensure secure and thorough launch

SUPPORTED PLATFORMS

- SAP Netweaver XI, BI, etc.
- JD Edwards (JDE) Enterprise One
- IBM Maximo WebSphere
- Oracle Data Integration
- PLCs, OPC Servers supporting TCP/IP
- Native SQL access
- M2M
- EAM
- Infor ION
- QAD, QAD File

CloudDISPATCH

The CloudDISPATCH platform works hand-in-hand with all of the Leading2Lean Engines. These engines are interoperable with one another to deliver a comprehensive solution to all facets of manufacturing and help you achieve the highest in operational excellence.

Together, Leading2Lean Engines bring to light the true performance of your site operations while engaging and empowering your workforce. Ultimately, transforming passion into profits, one truth at a time.
